India (1995-1996) Annual Survey of Industries 1994-95 (ASI 1994-95)

Overview	
Туре	Industrial Statistics (Organised Manufacturing & Labour Sector) Survey
Identification	IND-CSO-ASI-1994-95
Version	 Production Date: 2012-05-29 Version1.00: Reorganised Anonymized dataset for publication <u>Notes</u> The final unit level data of ASI 1994-95 is available in electronic media that can be had from Computer Centre, MOSPI on payment. The same is reproduced here. Meta data contains Schedule, Code list and Tabulation programme. These may be referred before processing the data. Reports/Tables are not attached as these are priced and may be purchased from Computer Centre, MOSPI
Series	The Collection of Statistics (Central) Rules, 1959 framed under the 1953 Act provided for, among others, a comprehensive Annual Survey of Industries (ASI) in India. This survey replaced both the CMI (Census of Manufacturing Industries) and SSMI (Sample Survey of Manufacturing Industries). The ASI was launched in 1960 with 1959 as the reference year and is continuing since then except for 1972. For ASI, the Collection of Statistics Act 1953 and the rules frame there-under in 1959 provides the statutory basis. The ASI refers to the factories defined in accordance with the Factories Act 1948, and thus has coverage wider than that of the CMI and SSMI put together.
Abstract	

Abstract

Introduction

The Annual Survey of Industries (ASI) is the principal source of industrial statistics in India. It provides statistical information to assess changes in the growth, composition and structure of organised manufacturing sector comprising activities related to manufacturing processes, repair services, gas and water supply and cold storage. Industrial sector occupies an important position in the State economy and has a pivotal role to play in the rapid and balanced economic development. The Survey is conducted annually under the statutory provisions of the Collection of Statistics Act 1953, and the Rules framed there-under in 1959, except in the State of Jammu & Kashmir where it is conducted under the State Collection of Statistics Act, 1961 and the rules framed there-under in 1964.

Kind of Data	Census and Sample survey data [cen/ssd]
Unit of Analysis	The primary unit of enumeration in the survey is a factory in the case of manufacturing industries, a workshop in the case of repair services, an undertaking or a licensee in the case of electricity, gas & water supply undertakings and an establishment in the case of bidi & cigar industries. The owner of two or more establishments located in the same State and pertaining to the same industry group and belonging to same scheme (census or sample) is, however, permitted to furnish a single consolidated return. Such consolidated returns are common feature in the case of bidi and cigar establishments, electricity and certain public sector undertakings.

Scope & Coverage

<u>Scope</u>

The survey covers all the factories registered under Sections 2(m)(i) and 2(m)(ii) of the Factories Act, 1948, i.e. 10 or more workers with the aid of power or 20 or more workers without the aid of power. The survey also covers bidi

and cigar manufacturing establishments registered under the Bidi and Cigar Workers (Conditions of Employment) Act 1966. All electricity undertakings engaged in generation, transmission and distribution of electricity, but not registered with the Central Electricity Authority (CEA) are also covered under ASI.

Keywords	FIXED CAPITAL, BONUS, WORKING CAPITAL, EMPLOYEES, WAGES AND SALARIES,
-	TOTAL EMOLUMENTS, FUELS CONSUMED, DEPRECIATION, GROSS OUTPUT, NET
	VALUE ADDED, FINISHED GOODS, PHYSICAL WORKING CAPITAL, TOTAL INPUT,
	TOTAL OUTPUT, PLANT & MACHINERY, PRODUCTS/BY-PRODUCTS, OUTSTANDING
	LOANS, NIC, ITEM CODE (ASICC CODE), STATE, EXIISE DUTY, SALES TAX,
	TRANSPORT CHARGES, REBATES, RAW MATERIALS, FUEL, ELECTRICITY AND
	WATER, EMPLOYMENT
Topics	Macroeconomics & Growth, Private Sector and Trade, Public Sector

Geographic Coverage

Coverage of the Annual Survey of Industries extends to the entire Factory Sector, comprising industrial units (called factories) registered under section 2(m)(i) and 2(m)(ii) of the Factories Act.1948, wherein a "Factory", which is the primary statistical unit of enumeration for the ASI is defined as:-

"Any premises" including the precincts thereof:-

(i) wherein ten or more workers are working or were working on any day of the preceding twelve months, and in any part of which a manufacturing process is being carried on with the aid of power or is ordinarily so carried on, or

(ii) wherein twenty or more workers are working or were working on any day of the preceding twelve months, and in any part of which a manufacturing process is being carried on without the aid of power. In addition to section 2(m)(i) & 2(m)(ii) of the Factories Act, 1948, electricity units registered with the Central Electricity Authority and Bidi & Cigar units, registered under the Bidi & Cigar Workers (Conditions of Employment) Act,1966 are also covered in ASI.

<u>Universe</u>

The survey cover factories registered under the Factory Act 1948.

Establishments under the control of the Defence Ministry,oil storage and distribution units, restaurants and cafes and technical training institutions not producing anything for sale or exchange were kept outside the coverage of the ASI.

Producers & Sponsors	
Primary Investigator(s)	Central Statistics Office (Industrial Statistics Wing), MOSPI, Government of India
Other Producer(s)	CSO(IS Wing), Kolkata (CSO) , MOSPI , Analysis, Design and data processing Field Operation Division, NSSO (FOD, NSSO) , MOSPI , Data Collection Computer Centre (CC) , MOSPI , Data dissemination
Funding Agency/ies	MOSPI, Government of India (GOI)
Other Acknowledgment(s)	Standing Committee on Industrial Statistics , Formulation and Finalisation of the survey study , GOI Computer Centre , Dissemination and web hosting , MOSPI

Sampling

Sampling Procedure

Sampling Procedure

The sampling design followed in ASI 1994-95 is a circular systematic one. All the factories in the updated frame (universe) are divided into two sectors, viz., Census and Sample.

a) CENSUS : To keep pace with the enormous growth of the factory sector, definition of the census sector was changed from ASI 1987-88 to the units having 100 or more workers irrespective of their operation with or without power and all electrical undertakings. All industrial units belonging to the 12 less industrially developed states/UT's viz. Manipur, Meghalaya, Nagaland, Tripura, Sikkim and Andaman & Nicobar Islands etc.

b) The rest of of the universe was covered on sampling basis so as to cover all the units in a span of three years. In any stratum, if the number of units was less than 20, then the entire stratum was enumearted completely along with census factories. In any stratum if no. of unit is between 21 & 60, a minimum sample of size 20 was selected by Circular Systematic Sampling. For all other units a uniform sampling fraction of 1/3 was adopted.

Deviations from Sample Design

There was no deviation from sample design in ASI 1994-95.

Weighting

Please note that an inflation factor (Multiplier) WGT is available for each unit against records for ASI 1996-97 data. The multiplier is calculated for each stratum (i.e. State X NIC-04 (4 Digit) after adjusting for non-response cases.

HOWEVER, IT IS TO BE NOTED THAT ALL THE INDUSTRIES (RECORDS) ARE ALREADY WEIGHTED BY MULTIPLIER FACTOR WGT. THERFORE NO NEED TO USE THE WGT.

Data Collection	
Data Collection Dates	start 1995-07-01 end 1996-06-30
Data Collection Mode	Statutory return submitted by factories as well as Face to face

Data Collection Notes

ASI Schedule has two parts: Part-I and Part-II. Part-I of ASI schedule aims to collect data on assets and liabilities, employment and labour cost, receipts, expenses, input items - indigenous and imported, products and by-products, distributive expenses etc. Part-II of ASI schedule aims to collect data on different aspects of labour statistics, namely, working days, mandays worked, absenteeism, labour turnover, man-hours worked, earning and social security benefits.

General Remarks regarding filling up of ASI schedules

The ASI work involves a number of stages. There are some general procedural aspects.

A separate return for each registered factory/electricity supply undertaking should be submitted as a rule. In following this, the aspects to be taken note of are:

Unless ownership has changed during the reference year, only one return is to be compiled for one factory. If a part of a registered factory has been operated by the owner and another part by the occupier the total manufacturing activities of both the owner and the occupier should be duly recorded in one return.

If the factory as a whole has been rented out, the return for the factory may be filled from the occupier's point of view.

If for a factory, which is served with notice, is found that its products are meant for training of inmates and has no sale value and are produced as a product during training, the facts may be reported to the Statistics Authority and data need not be collected This is normally applicable to Training Centers and Jails which are registered as factories. Further, workshop in jails registered under factories Act should be canvassed for ASI only when the products of the workshop are meant for sale. In case the products are not sold but are incidental to training to the convicts engaged at the workshop, such a workshop is outside the purviews of ASI.

Submission of Joint Returns

Although, as per rules for such registered unit of inquiry a separate return should be furnished, in special circumstances, where the accounts of two or more registered units cannot be bifurcated factory wise a joint return may be accepted in a particular ASI if all the following conditions are fulfilled: They are located in the same State. They belong to the Census Scheme i.e. 100 or more workers only. They belong to the same industry at the ultimate NIC code level.

There will be no joint return in sample sector. Also there will be no joint return with Census and Sample. In such cases appropriate apportions should be done to avoid any complications in estimation different parameters. In census sector also appropriate apportions should be made if some changes occur in joint returns.

Questionnaires

Annual Survey of Industries Questionnaire (in External Resources) is divided into different blocks:

BLOCK1/2/16 : RECORD TYPE 011 : IDENTIFICATION PARTICULARS (Filled by CSO and Industrial Units) BLOCK 4 : RECORD TYPE 040 : SCHEDULE OF FIXED ASSETS BLOCK 4A : RECORD TYPE 040 : DETAILS OF PLANT AND MACHINERY BLOCK 5 : RECORD TYPE 051-054 : SCHEDULE OF WORKING CAPITAL AND LOANS BLOCK 6 : RECORD TYPE 074 : WORKING DAYS AND SHIFTS BLOCK 7 : RECORD TYPE 071-74 : EMPLOYMENT BLOCK 8 : RECORD TYPE 081-82 : LABOUR COST (INCLUDING FOR CONTRACT LABOUR) BLOCK 9 : RECORD TYPE 091 : FUELS, ELECTRICITY AND WATER CONSUMED (EXCLUDING INTERMEDIATE PRODUCTS) BLOCK 10 : RECORD TYPE 101 : OTHER EXPENDITURE BLOCK 11 : RECORD TYPE 111 : OTHER OUTPUT/RECEIPTS BLOCK 12 : RECORD TYPE 121 : ELECTRICITY BLOCK 13 : RECORD TYPE 131 : MATERIALS CONSUMED BLOCK 13 A : RECORD TYPE 132 : INPUT ITEMS (indigenous items consumed) BLOCK 13 B : RECORD TYPE 133 : INPUT ITEMS – directly imported items only (consumed) BLOCK 14 : RECORD TYPE 141 : PRODUCTS AND BY-PRODUCTS (manufactured by the unit) BLOCK 14 A : RECORD TYPE 142 : DISTRIBUTIVE EXPENSES

Data Collector(s)	NSSO(Field Operation Division) (NSSO(FOD)), Ministry of Statistics and Programme
	Implementation

Supervision

NSSO under the Ministry of Statistics and PI, Government of India is responsible for supervision of data collection.

Data Processing & Appraisal

Data Editing

Pre-data entry scrutiny was carried out on the schedules for inter and intra block consistency checks. Such editing was mostly manual, although some editing was automatic. But, for major inconsistencies, the schedules were referred back to NSSO (FOD) for clarifications/modifications.

Code list, State code list, NIC 87, NIC 70 and ASICC code are also may be referred in the External Resources which are used for editing and data processing as well.

Other Processing

After pre-data entry scrutiny, all the scrutinised schedules were entered by manual typing through data entry software which was prepared in house. CSO has full fledged Data Processing Centre with technical staff to take up all the processing activities on well established Client-Server architecture system that is used for in house data entry and validation. After data entry, verification of the schedules was also done programmatically. After all kinds of coverage checking and verification, logical validation was done and then the tables were prepared as per the tabulation programme.

The results of ASI are produced in the form of two volumes. Volume - I presents statewise and industry-wise data relating to capital, employments, output - gross and net and several other economic parameters relevant to the industrial sector. Volume -II provides details on materials consumed and ex-factory of products and by products both at all-India level as well as at the level of state/UTs. RSE of estimates at all India level are also available in Volume-I. These volumes are available on cost.

Estimates of Sampling Error

Relative Standard Error (RSE) is calculated in terms of worker, wages to worker and GVA using the formula. Programs developed in Visual Foxpro are used to compute the RSE of estimates.

Other Forms of Data Appraisal

To check for consistency and reliability of data the same are compared with the NIC-2digit level growth rate at all India Index of Production (IIP) and the growth rates obtained from the National Accounts Statistics at current and constant prices for the registered manufacturing sector.

Confidentiality

The ASI data at factory level are strictly confidential and are to be used only for statistical purposes after aggregation.

The collection of Statistics Act assures confidentiality of the data to the factories.

To ensure confidentiality, data of factories with less than three units in an industry are merged. Location of the unit is also not divulged in the micro data.

Access Conditions

Data is chargeable. Document accessing for data may be seen at "Data Access" tab on home page of Micro Data Archieve.

Citation Requirements

Files Description

Dataset contains 19 file(s)

IDENTIFICATION PARTICULARS (B1&2)	
# Cases	57926
# Variable(s)	38
File Structure	Type: relational Key(s): RSL (Running SI. No.), State (State Code)

File Content

Blocks 1/2/16 : Identification Particulars : The file contains the Identification particulars and classificatory characteristics of Factory. It contains the weighting coefficient or Multiplier - WGT. Variables under this blocks are:

Industry, Running Serial Number, State, Scheme, Record category which are common in all the blocks. Primary key is State X RSL (Running serial number). There are few duplicate records in the data.

Variables in the block are:

Common information in aoll the blocks : Industry,Running SI. No.,State, Scheme,Record Category. Other fields

Cont. R.S.L., Permanent SI. No., No. of Units

State/Dist/Block,FOD Region Code,R/U/M Code,Backward Area Code,Year of Initial Prod.

Type of Organisation, Type of Ownership, Type of Management, Whether ancillary unit, Wheather registered Accounting Year Closing, Months of operation, Type of power used, Open/Closed Code etc.

FIXED ASSETS (BLOCK4)	
# Cases	337775
# Variable(s)	16
File Structure	Type: relational Key(s): RSL (Running SI. No.), State (State code)

File Content

Block - 4 - fixed assets : The file contains Fixed Assets details.

Fixed assets are those, which have generally normal productive life of more than one year;

it covers all type of assets, new or used or own constructed, deployed for productions, transportation, living or recreational facilities, hospitals, schools, etc. for factory personnel;

it would include land, building, plant and machinery, transport equipment, etc.;

it includes the fixed assets of the head office allocable to the factory and also the full value of assets taken on hirepurchase basis (whether fully paid or not) excluding interest element;

it excludes intangible assets and assets solely used for post-manufacturing activities such as, sale, storage, distribution, etc.

Fields in this blocks are:

Common information in all the blocks : Industry,Running SI. No.,State, Scheme,Record Category. Sub-Record Code,

Item number of the type of assets,

Gross value : Opening as on, due to revaluation, actual addition, deduction & adjustment during the year and Closing as on.

Depreciation: upto year begining, provided during the year, adjustments during the year and upto year end Net Value: opening as on, closing as on.

Record type 040 (RC040)

Fixed Assets (Block 4A)	
# Cases	55890
# Variable(s)	15
File Structure	Type: relational Key(s): RSL (Running SI. No.), State (State Code)

File Content

Block - 4A - Plant & Machinery The file contains Fixed Assets details.

Fields in this blocks are:

Common information in aoll the blocks : Industry,Running SI. No.,State, Scheme,Record Category. Sub-Record Code,

Item number of the type of assets,

P&M - Under Opening,P&M - leased in opening,P&M - leased in opening,P&M - Total opening ASI-Year (Last 2-digit),P&M - Leased in closing,P&M - Leased out closing,P&M - Total closing.

Record type is 040 Sub category 014.

WORKING CAPITAL AND LOANS (BLOCK 5)	
# Cases	97725
# Variable(s)	13
File Structure	Type: relational Key(s): RSL (Running Sl. No.), State (State code)

File Content

Block -5 - WORKING CAPITALS & Loans :

Working capital and loans: This is defined to include all physical inventories owned, held or controlled by the factory as on the closing day of the accounting year such as the materials, fuels and lubricants, stores, etc. that enter into products manufactured by the factory itself or supplied by the factory to others for processing. Physical working capital also includes the value of stock of materials, fuels and stores, etc. purchased expressly for resale, semi-finished goods and goods-in-process on account of others and goods made by the factory which are ready for sale at the end of the accounting year. However, it does not include the stock of the materials, fuels, stores, etc. supplied by others to the factory for processing. Finished goods processed by others from raw materials supplied by the factory and held by them are included and finished goods processed by the factory from raw materials supplied by others, are excluded.

Outstanding loans represent all loans, whether short-term or long-term, whether interest bearing or not, outstanding according to the books of the factory as on the closing day of accounting year.

Fields in this block are :

Common information in aoll the blocks : Industry,Running SI. No.,State, Scheme,Record Category. Other fields :

Row materials & components, Fuels and lubricants, Spares, stpres and others, Semi-finished goods, Finished goods, Total inventory etc.

Record type is 051 & 053

<u>Notes</u>

In this block :

if Record type = 051 then for all the fields Opening balance (Col 3) is entered

If Record type = 053 then for all the fields Closing balance (Col 4) is entered

WORKING CAPITAL AND LOANS (BLOCK 5A)

# Cases	110842
# Variable(s)	15
File Structure	Type: relational Key(s): RSL (Running SI. No.), State (State code)

File Content

Block -5 - WORKING CAPITALS and Loans :

Working capital and loans: This is defined to include all physical inventories owned, held or controlled by the factory as on the closing day of the accounting year such as the materials, fuels and lubricants, stores, etc. that enter into products manufactured by the factory itself or supplied by the factory to others for processing. Physical working capital also includes the value of stock of materials, fuels and stores, etc. purchased expressly for resale, semi-finished goods and goods-in-process on account of others and goods made by the factory which are ready for sale at the end of the accounting year. However, it does not include the stock of the materials, fuels, stores, etc. supplied by others to the factory for processing. Finished goods processed by others from raw materials supplied by the factory and held by them are included and finished goods processed by the factory from raw materials supplied by others, are excluded.

Outstanding loans represent all loans, whether short-term or long-term, whether interest bearing or not, outstanding according to the books of the factory as on the closing day of accounting year.

Fields in this block are :

Common information in aoll the blocks : Industry,Running SI. No.,State, Scheme,Record Category. Other fields :

Cash in hand and bank,Sundry debtors,Other current assets,Sundry creditors,Overdrafts etc.,Other current liabilities,Working capital, Outstanding loan etc.

Record type 052&054

<u>Notes</u>

In this block :

if Record type = 052 then for all the fields Opening balance (Col 3) is entered

If Record type = 054 then for all the fields Closing balance (Col 4) is entered

EMPLOYMENT (BLOCK 7)	
# Cases	119056
# Variable(s)	14
File Structure	Type: relational Key(s): RSL (Running SI. No.), State (State code)

File Content

Block E - Employment : Information collected in this block is regarding employment and number of mandays worked for the employees to be collected.

Fields in this block are :

Common information in aoll the blocks : Industry,Running SI. No.,State, Scheme,Record Category. Other fields : represents mandays worked (Col 5) for Men,Women,Children,Empl. Through contractors,Sup. & managerial staff,Other employees,Total etc

Record type is 071,072 and 073

EMPLOYMENT & WORKING DAYS(BLOCK 7_6)

# Cases	55889
# Variable(s)	21
File Structure	Type: relational Key(s): RSL (Running SI. No.), State (State code)

File Content

Block 7 - Employment : Information collected in this block is regarding employment and number of mandays worked for the employees to be collected.

Common information in aoll the blocks : Industry, Running SI. No., State, Scheme, Record Category.

Other fields : represents Average number of persons worked (Col 6) for Men,Women,Children,Empl. Through contractors,Sup. & managerial staff,Other employees,Working proprietors,Unpaid family workers ,If co-operative etc.,Total,No. of manufacturing days,Total no. of working days,Total no. of shifts, Length of shifts etc.

Record category : 074

LABOUR COST (BLOCK 8)	
# Cases	54460
# Variable(s)	17
File Structure	Type: relational Key(s): RSL (Running SI. No.), State (State code)

File Content

Block 8 - Labour cost (including for contract labour) : Information collected in this block is regarding labour cost.

In this block emoluments of the employees to be collected. Emoluments are defined as wages paid to all employees plus imputed value of benefits in kind, i.e., the net cost to the employers on those goods and services provided to employees free of charge or at markedly reduced cost which are clearly and primarily of benefit to the employees as consumers. It includes profit sharing, festival and other bonuses and ex-gratia payments paid at less frequent intervals (i.e. other than bonus paid more or less regularly for each period). Benefits in kind include supplies or services rendered such as housing, medical, education and recreation facilities. Personal insurance, income tax, house rent allowance, conveyance, etc. for payment by the factory also is included in the emoluments.

Fields in this block are : Common information in aoll the blocks : Industry, Running SI. No., State, Scheme, Record Category.

Other fields : Wages and salaries-workers, Wages and salariesSuper.& Mang. Staff, Wages and salaries Others, Wages and salaries Total, Bonus-workers, Bonus-Super. & Mang. Staff, Bonus-Others, Bonus - Total etc

Record type is 081

File Content

Block 8 - Labour cost (including for contract labour) : Information collected in this block is regarding labour cost.

In this block emoluments of the employees to be collected. Emoluments are defined as wages paid to all employees plus imputed value of benefits in kind, i.e., the net cost to the employers on those goods and services provided to employees free of charge or at markedly reduced cost which are clearly and primarily of benefit to the employees as consumers. It includes profit sharing, festival and other bonuses and ex-gratia payments paid at less frequent intervals (i.e. other than bonus paid more or less regularly for each period). Benefits in kind include supplies or services rendered such as housing, medical, education and recreation facilities. Personal insurance, income tax, house rent allowance, conveyance, etc. for payment by the factory also is included in the emoluments.

Fields in this block are :

Common information in aoll the blocks : Industry, Running SI. No., State, Scheme, Record Category.

Other fields : Total Contbn. To PF etc.,Total welfare expenses,Total labour cost etc. Record type is 082

FUELS, ELECTRICITY ETC	
# Cases	89591
# Variable(s)	19
File Structure	Type: relational Key(s): RSL (Running Sl. No.), State (State)
File Content	

Block - 9 Fuels, Electricity and water consumed (excl. intermediate products): (All the items are for Quantity consumed and its value in Rs.)

Fields in this block are :

Common information in aoll the blocks : Industry,Running SI. No.,State, Scheme,Record Category. Other fields : represents iquantity and value for 4 item codes respectively.

Record type 091

OTHER EXPENDITURE (BLOCK 10_1)	
# Cases	56614
# Variable(s)	17
File Structure	Type: relational Key(s): RSL (Running SI. No.), State (State code)

File Content

Block -10 Other Expenditure : (All the items are Expenditure incurred in Rs.)

This block includes the cost of other inputs as both the industrial and non-industrial services rendered by others, which are paid by the factory and most of which are reflected in the ex-factory value of its production during the accounting year.

Fields in this block are :

Common information in aoll the blocks : Industry, Running SI. No., State, Scheme, Record Category.

Other fields :

Work done by others, Repair & maint- Machinery, Repair & maint- Building, Repair & Maint- Others, Inward Freight etc.

Rates and Taxes, Postage, Telephone, etc., Insurance charges, banking charges, Printing & stationery

Record type is 101

OTHER EXPENDITURE (BLOCK 10_2)	
# Cases	56854
# Variable(s)	17
File Structure	Type: relational Key(s): RSL (Running SI. No.), State (State code)

File Content

Block -10 Other Expenditure : (All the items are Expenditure incurred in Rs.)

This block includes the cost of other inputs as both the industrial and non-industrial services rendered by others, which are paid by the factory and most of which are reflected in the ex-factory value of its production during the accounting year.

Fields in this block are :

Common information in aoll the blocks : Industry, Running SI. No., State, Scheme, Record Category.

Other fields : Miscellaneous, Total, Rent of land etc., Rent for Building, Rent for P&M, Rent for other assets Total rent , Interest , Purchese value of goods sold, Own construction labour cost

Record type 102

OTHER OUTPUT-RECEIPTS (BLOCK 11)	
# Cases	47766
# Variable(s)	17
File Structure	Type: relational Key(s): RSL (Running SI. No.), State (State code)

File Content

Block -11 Other Outputs/Receipts (Incomes) : The file contains Other OUTPUT/RECEIPTS Detail (All items are Receipts in Rs.) :

In this block, information on other output/receipts is to be reported.

Fields in this block are :

Common information in aoll the blocks : Industry, Running SI. No., State, Scheme, Record Category.

Other fields :

Own contruction-others, Own contruction-total, Work bone for others, Receipt for non-industrial services, Variation of stock of semi- finished googes (*)

Value of electricity soled, Value of own construction, Total, Sale value of goods old etc.

ELECTRICITY (BLOCK 12)	
# Cases	54095
# Variable(s)	11
File Structure	Type: relational Key(s): RSL (Running Sl. No.), State (State code)

File Content

Block - 12 : Electricity (Not applicable to electricity industry) : In this block, information on Quantity of electricity purchased, generated, sold and consumed is reported.

Fields in this block are :

Common information in aoll the blocks : Industry, Running SI. No., State, Scheme, Record Category.

Other fields :Electricity purchased, electricitygenerated, Electricity sold, Electricity consumed.

Record type is 121

MATERIALS CONSUMED EXCL			
# Cases	139566		
# Variable(s)	19		
File Structure	Type: relational Key(s): RSL (Running SI. No.), State (State code)		

File Content

Block - 13 : Materials consumed (excluding intermediate products) during the accounting year: This block covers all the goods (raw materials, components, chemicals, packing material, etc.) which entered into the production process of the factory during the accounting year.

Fields in this block are :

Common information in aoll the blocks : Industry, Running SI. No., State, Scheme, Record Category.

Other fields : Quantity and value consumed for 4 item codes.

Record type is 131

MATERIALS CONSUMED INDUSTRIAL COMPNENTS ETC (BLOCK 13A)

# Cases	88665
# Variable(s)	17
File Structure	Type: relational Key(s): RSL (Running SI. No.'), State (State code)

File Content

Block - 13 A : Materials consumed (Indigenous and mported industrial components, accessoriess) during the accounting year:

Fields in this block are :

Common information in the block : Industry, Running SI. No., State, Scheme, Record Category.

Other fields : Quantity and value consumed for Indigenous and imported consumption for 4 item codes respectively.

Record type is 132.

MATERIALS CONSUMED IMPORTED (BLOCK 13B)

# Cases	4175
# Variable(s)	19
File Structure	Type: relational Key(s): RSL (Running Sl. No.), State (State code)

File Content

Block - 13 B : Materials consumed (Imported raw materials) during the accounting year:

Fields in this block are :

Common information in the block : Industry, Running SI. No., State, Scheme, Record Category.

Other fields : Quantity and value consumed for imported consumption for 4 item codes.

Record type is 133.

PRODUCTS AND BY-PRODUCTS (BLOCK 14)				
# Cases	153839			
# Variable(s)	17			
File Structure	Type: relational Key(s): RSL (Running SI. No.), State (State code)			

File Content

Block 14: Products and by-products inclding fixed assets (excluding intermediate products) manufactured and sold during the year 1996-97.

File contains data for Manufacture, Sale and distributive expenses. The items are Item code, Quantity sold, Quantity manufactures, Gross sale value, Excise duty, Sales tax, others, Total, Per unit net sale value and Net value of output(ex-factory value)

Data name is represented by Block number and column number like bl14_c1...

Fields in this block are :

Common information in aoll the blocks : Industry,Running SI. No.,State, Scheme,Record Category. Other fields : Item code,Quantity manufactured,Quantity sold,Gross sale value,Excise duty,Sale tax Dist. Expenses- other,Dist. Expenses- total,Itenwise N.S.V.unit,Itenwise Ex.fact. Value etc.

Record category is 141

DISTRIBUTIVE EXPENSES ETC (BLOCK 14A)				
# Cases	38812			
# Variable(s)	14			

File Structure	Type: relational Key(s): RSL (Running SI. No.), State (State code)					
File Content Block 14 A : Deatils of distributive expenses on sale during the accounting year File contains Distributive expenses in value(Rs.) for items like Excise duty, Sales Tax, Transport charges, Commission to agents, Rebates, Others and Total.						
Fields in this block are : Common information in aoll the blocks : Industry,Running SI. No.,State, Scheme,Record Category. Other fields : Excise duty,Sale tax,Transport charges,Commission,Rebates,Other etc.						

Total Record type is 142.

^{#7} BI4_i1	: Opening (C	Gross)			
Informatior	ı	[Type= continuous] [Format=numeric]	[Range= 0-1488364739	55] [Missing=*]	
				740074400 074 /1	

Statistics [NW/ W]	Valid=337775 /-] [Invalid=0 /-] [Mean=22435539.819 /-] [StdDev=713871400.371 /-]	
Literal question	Gross Value- Opening as On	
Interviewer's instructions	The original cost or revalued gross figures of the fixed assets (whenever revaluation is carried out) as on the opening day of the accounting year is to be reported. In case the theoretical working life of the assets expires then the value should be recorded as Rs.1/	

#8 BI4_i2: Addition by revaluation

Information	[Type= continuous] [Format=numeric] [Range= 0-86288162740] [Missing=*]	
Statistics [NW/ W]	[Valid=337775 /-] [Invalid=0 /-] [Mean=217272.482 /-] [StdDev=22238686.13 /-]	
Literal question	Addition by revaluation	
Interviewer's instructions	value addition during the year: Fixed assets acquired from others during the year, whether fully paid or not, should be valued at the full cost incurred, i.e., at the delivered price plus the cost of installation including any fees and taxes paid but excluding financing costs relating to the period after the commencement of production. This would include: (1) value of all purchases of materials on capital account during the accounting year, (2) amount paid for service charges during the accounting year on capital account, (3) value of all fixed assets, whether fully paid or not, taken on capital account during the accounting year. All items purchased, old or new, including those constructed by the factory and capitalized will be recorded under Columns (4) & (5). In case any additions to fixed assets are 'second hand', items purchased from within the country during the year, the cost of these should be shown separately with a footnote. Fixed assets produced by the establishment for its own use should be valued at the cost of all work put in place including any overhead costs allocable to this work. In case any revaluation of the fixed assets has been carried out during the accounting year, the extent of its impact may be included under Column (4). However, the extent of total revaluation shall be shown with a footnote under the block.

Definition	WORKING CAPITAL is the sum total of the physical working capital as already defined above and the cash deposits in hand and at bank and the net balance receivable over amounts payable at the end of the accounting year. Working capital, however, excludes unused overdraft facility, fixed deposits irrespective of duration, advances for acquisition of fixed assets, loans and advances by proprietors and partners irrespective of their purpose and duration, long-term loans including interest thereon and investments.

Definition	WAGES AND SALARIES are defined to include all remuneration in monetary terms and also payable more or less regularly in each pay period to workers as compensation for work done during the accounting year. It includes (a) direct wages and salary (i.e., basic wages/salaries, payment of overtime, dearness, compensatory, house rent and other allowances) (b) remuneration for the period not worked (i.e., basic wages, salaries and allowances payable for leave period, paid holiday, lay- off payments and compensation for unemployment, if not paid from sources other than employers) (c) bonus and ex-gratia payment paid both at regular and less frequent intervals (i.e., incentive bonuses, productive bonuses, profit sharing bonuses, festival or year-end bonuses etc.) It excludes lay off payments which are made from trust or other special funds set up exclusively for this purpose i.e., payments not made by the employer. It also excludes imputed value of benefits in kind, employer's contribution to old age benefits and other social security charges, direct expenditure on maternity benefits creches and other group benefits Travelling and other expenditure incurred for business purposes and reimbursed by the employer are excluded. The wages are expressed in terms of gross value i.e., before deduction for fines, damages, taxes, provident fund, employee's state insurance contribution etc.

Definition	WAGES AND SALARIES are defined to include all remuneration in monetary terms and also payable more or less regularly in each pay period to workers as compensation for work done during the accounting year. It includes (a) direct wages and salary (i.e., basic wages/salaries, payment of overtime, dearness, compensatory, house rent and other allowances) (b) remuneration for the period not worked (i.e., basic wages, salaries and allowances payable for leave period, paid holiday, lay- off payments and compensation for unemployment, if not paid from sources other than employers) (c) bonus and ex-gratia payment paid both at regular and less frequent intervals (i.e., incentive bonuses, productive bonuses, profit sharing bonuses, festival or year-end bonuses etc.) It excludes lay off payments which are made from trust or other special funds set up exclusively for this purpose i.e., payments not made by the employer. It also excludes imputed value of benefits in kind, employer's contribution to old age benefits and other social security charges, direct expenditure on maternity benefits creches and other group benefits Travelling and other expenditure incurred for business purposes and reimbursed by the employer are excluded. The wages are expressed in terms of gross value i.e., before deduction for fines, damages, taxes, provident fund, employee's state insurance contribution etc.

Notes	No document is available for explanation of 4 Item_CD code. In the schedule item is represented for 1-15 Item sr No. corresponding to Coal, Lignite etc. However, item code values are mostly 0-15 and 10000. In the layout, it is mentioned that total of this block will be keyed in with the item code 9999 leaving quantity blank but there is no "9999" item code instead "10000" is there which contains mostly 0 for Quantity. This issue would be resolved.
